

Course Rationale

Poor infant feeding practices continue to be a leading cause of morbidity, mortality, malnutrition and poor growth of infants and young children, and are increasingly recognised to have important long term health consequences. The established global recommendations are initiation of breastfeeding within one hour of birth, exclusive breastfeeding for six months and complementary feeding with continued breastfeeding from six months up to two years or more. Few countries meet these targets, and in many places programmes to promote optimal infant feeding are slowing down, despite the availability of effective interventions, and extensive experience of implementing them.

In 2005, a new Innocenti Declaration was adopted, 15 years after the original Declaration which led to the development of the Baby-Friendly Hospital Initiative. The 2005 Innocenti calls upon all Governments and other parties to take a number of actions, including revitalising the Baby-Friendly Hospital Initiative and ensuring that appropriate guidelines and skill acquisition regarding infant and young child feeding are included in both pre-service and in-service training of all health care staff, to enable them to implement optimum infant and young child feeding policies and to provide a high standard of breastfeeding management and counselling to support mothers and communities. A series of articles published by the Lancet in early 2016 reviews the evidence for both the importance of breastfeeding and the effectiveness of these known interventions.

Taking these actions requires resource people with leadership ability and sufficient knowledge and skill to educate and train others. This two-week up-to-date evidence-based course is designed to equip participants for this task, and to give them a wider background than is possible with only short practical courses. Training for resource people has hitherto been available mainly in centres such as London, which command many resources, but which are costly and difficult for many people to attend. WABA is once again collaborating with the Infant Feeding Consortium (IFC) to make an appropriate course available in South East Asia.

Course Programme

The course is residential and intensive with 11 full days of teaching, from Monday 27th February to Saturday 11th March 2017, and with two days for recreation and private study in the middle – Saturday 4th and Sunday 5th March 2017. Participants should arrive by 3 pm on the afternoon of Sunday 26th February to register, and for an Introductory Session and Welcome Reception. They should be prepared to stay until the evening (not earlier than 6pm) of Saturday 11th March, or until the morning of Sunday 12th March.

Certificates of Attendance will be presented on the afternoon of Saturday 11th March. To qualify for a Certificate participants are required to attend the course full-time.

Teaching Methods

The teaching will include a number of Clinical Practice sessions, when participants will work in small groups with mothers and babies at a local hospital and clinic, to practice the skills that they learn in the classroom. Classroom sessions will include lecture presentations, practical demonstrations and exercises, and seminar and group work. Participants will be asked to prepare privately and in groups for some sessions. Reference material and handouts will be provided variously in electronic or paper form. Participatory training methods will provide some flexibility for Course Directors to respond to individual requirements.

Topics Covered

The main emphasis of the course will be on the management of breastfeeding, breastfeeding counselling and the baby-friendly hospital initiative. Basics of complementary feeding and HIV and infant feeding will also be included, and teaching throughout will reflect participants' need to learn about advocacy and training.

THE TOPICS COVERED WILL INCLUDE:

- ▶ **Global policies related to infant and young child feeding and their rationale**
- ▶ **Evidence for the influence of breastfeeding on health and emotional development of infants, and on mothers' health**
- ▶ **Physiology of lactation, suckling, and the secretion of breast milk**
- ▶ **Composition of breast milk, and how it differs from infant formula**
- ▶ **Immunology of breastmilk, and the importance of colostrum**
- ▶ **Positioning and attachment of the infant at the breast**
- ▶ **Communication skills for working with mothers and babies**
- ▶ **Influence of obstetric practice on breastfeeding**
- ▶ **Initiation of breastfeeding – skin-to-skin contact and the first three days**
- ▶ **Milk sufficiency – under- and over-supply**
- ▶ **Breast refusal and the reluctant breastfeeder**
- ▶ **Breast conditions (nipple form, sore nipples, engorgement, mastitis)**
- ▶ **Maternal health and nutrition, and maternal medication**
- ▶ **The nutritional adequacy of exclusive breastfeeding**
- ▶ **Breast milk expression and storage**
- ▶ **Relactation**
- ▶ **Developmental readiness for feeding**
- ▶ **Introduction of complementary foods**
- ▶ **Obstacles to exclusive breastfeeding**
- ▶ **Feeding of low birth weight babies**
- ▶ **Kangaroo mother care**
- ▶ **Baby-Friendly Hospital Initiative – implementing the 10 steps**
- ▶ **Baby-friendly practices beyond the hospital**
- ▶ **Community support for optimal infant feeding – mother and peer support**
- ▶ **HIV and infant feeding**
- ▶ **Women and work**
- ▶ **The International Code of Marketing of Breast-milk Substitutes**
- ▶ **Programmes and strategies to achieve optimal infant feeding**
- ▶ **Developing advocacy and training skills for resource persons.**

Who Should Attend

The course is designed for doctors, midwives and other senior health professionals who are involved in national or local infant feeding programmes as clinicians, trainers, advisers, programme coordinators or advocates for optimal infant feeding. Teams from the same institution or locality are particularly welcome. The course is conducted mainly in English, though there will also be some use of Malay and other local languages, particularly for communication with mothers.

Course Costs

The cost of the two week course, including twin-sharing accommodation in a 4-star hotel with ensuite facilities and meals (excluding evening meals), and essential reference materials is US\$ 3,300. This does not include the cost of travel to Penang.

WABA does not accept sponsorship of any kind from companies producing breastmilk substitutes, related equipment (including feeding bottles, teats and breast pumps) and complementary foods, and cannot accept applicants funded by such companies.

To Apply

If you are interested in attending, kindly complete the attached application form and send it to:

WABA

P.O. Box 1200, 10850 Penang, Malaysia

Tel: +604-6584816 • Fax: +604-657 2655 • Email: info@waba.org.my

Course Directors

SANDRA LANG

Independent midwifery teacher in lactation and neonatal nursing

SPECIALIST AREAS: Practical issues of infant feeding, particularly for pre-term, sick and vulnerable babies, Maternal and newborn care, HIV and infant feeding, curriculum development, training and implementation of international infant feeding initiatives including BFHI. Author of the book Breastfeeding Special Care Babies.

Formerly Director of the course Breastfeeding Practice and Policy at the Institute of Child Health, UCL, London.

FELICITY SAVAGE

Child Health Specialist

SPECIALIST AREAS: Training health workers on breastfeeding, and development of technical and policy documents on infant feeding; Author of the book Helping Mothers to Breastfeed Former WHO Medical Officer co-coordinating the development of infant feeding training courses for the Department of Child and Adolescent Health. Chairperson of the Steering Committee for the World Alliance for Breastfeeding Action (WABA).

Formerly Director of the course Breastfeeding Practice and Policy at the Institute of Child Health, UCL, London.

Breastfeeding: Advocacy & Practice

Seventh course for doctors, midwives
and other senior health professionals

27th February – 11th March 2017 • Penang, Malaysia

APPLICATION FORM

If you are interested in attending, please send an application to reserve a place even though you may not have secured funding. We will send you a letter of provisional acceptance, a Registration Form and other information which will enable you to start making arrangements and seeking funds. The next step will be for you to register for the course by the end of October 2016 with a deposit of USD 300.00

Completed application form should be sent to:
WABA, P.O. Box 1200, 10850 Penang, Malaysia
Fax: 60-4-657 2655 Email: info@waba.org.my

(Please keep a copy of the form for your own reference)

PERSONAL PARTICULARS

Name: _____

Profession and Qualifications: _____

Present position and place of work: _____

E-mail: _____

[All correspondence will be by email unless you specify otherwise]

Mailing address: _____

Tel: _____ Mobile phone: _____

Fax: _____

Please provide a short (half to one page) summary of your CV outlining:

- Your involvement with infant feeding work, past and present
- Any previous training courses on infant feeding which you have attended, or which you have taught
- Your proficiency in English – written and spoken, especially comprehension (comprehension is the most important for participation in the course).

The Infant Feeding Consortium (IFC), United Kingdom, provides specialists in training, curricula development, formative research, programme review and policy development on infant and young child feeding.

The World Alliance for Breastfeeding Action (WABA) is a global network of individuals and organisations concerned with the protection, promotion and support of breastfeeding worldwide based on the Innocenti Declaration, the Ten Links for Nurturing the Future and the WHO/UNICEF Global Strategy for Infant and Young Child Feeding. Its core partners are International Baby Food Action Network (IBFAN), La Leche League International (LLL), International Lactation Consultant Association (ILCA), Wellstart International, Academy of Breastfeeding Medicine (ABM) and LINKAGES. WABA is in consultative status with the United Nations Children's Fund (UNICEF) and is an NGO in Special Consultative Status with the Economic and Social Council of the United Nations (ECOSOC).
